

'State of the Art' Online Billing Solution

Gold Numbers leading Online Billing Solution provides instant access to a range of detailed billing data from online invoices to comprehensive reporting, available at your fingertips.

- We offer a complete telecoms billing capability, allowing presentation of invoices and reporting from fixed line, mobile and call detail records to a range of fixed and variable recurring charges.
- Invoices and reports can be presented in paper, email, disk and web formats, with customers able to access a comprehensive billing history online.
- A wide range of standard reports in tabular and graphical formats are available and an almost unlimited range of bespoke reports are available on request.
- Extension and departmental level billing allows us to offer a fully outsourced third party billing capability

Take away the pain, workload and frustration of dealing with multiple bills, multiple suppliers and extension billing with a fully outsourced billing solution from Gold Numbers.

Online Invoicing

- Fixed line, Mobile, Inbound and CDR processing offers a complete solution
- Fixed and variable recurring charges, such as rentals, can be added to the invoice
- Email presentation of invoices and reports increase the speed of generation
- Secure web access allows users to access their billing history online
- Invoices can be presented in paper, email, disk and web formats to suit customer needs

Powerful Reporting

- A wide range of standard reporting in tabular and graphical formats
- Detailed breakdowns by call classification, call destination, day, time and site all presented as standard
- Comprehensive range of statistics showing longest duration, most expensive, most frequently dialed numbers as standard
- Monitor staff by numbers dialed – ie premium rate / mobile to reduce any abuse
- Almost unlimited range of bespoke reporting available on request

Extension Billing

- Extension and departmental level billing allows for a fully outsourced billing capability
- Fully branded billing bearing your corporate identity, both paper based and web enabled
- Set up billing hierarchy with ability to alter billing criteria and values by customer or destination
- Set up authorised users to maintain key billing parameters such as service descriptors on numbers and services
